Woodcolors solvent based

Description
Solvent pigment preparation based on transparent iron oxides.

Characteristics
• White Spirit alkyd resin based
• High concentration of pigment

Applications
• Varnish
• Wood stain

Special features
• Wood tint formulas available
• Ready-to-use tints available
• References based on White spirit < 1% of aromatic solvent available

Packaging
• Metallic drum: 25 kg, 50 kg, 200 kg

** less than 1% aromatic solvent

* The resistance properties are based on data from the pigment supplier. These values may vary according to the dosage level and the system used by the customer. It is the responsibility of the producer of the final article to verify light fastness, heat stability and other resistance properties in his system.

Next to the basic colors to make the color formula yourself you can order also the ready to use color formula.
